

Fahe Impact: Tennessee's 6th District

Fahe is a Network of over 50 nonprofit organizations building the American Dream in Appalachia. We do this by channeling investments through our Community Development Financial Institution (CDFI), leading community and economic development work, and by building, repairing, and rehabbing homes that our neighbors can afford. **Since 2016, the Fahe Network has invested more than \$143.3 million to produce 1,010 safe and affordable housing units in TN-06.**

Types of Network Investment TN-06

The Housing Shortage in TN-06

Despite the over \$143.3 million we have invested since 2016, there is still much work to be done. Due to a shortage of private investment in new affordable housing construction and a hot real estate market in the Nashville exurbs, TN-06 is characterized by an aging and insufficient supply of affordable housing, as reflected in the data on the next page. This shortage creates challenges for economic and workforce development, as having a safe place to call home is a prerequisite to stability for working families.

Housing Shortage by the Numbers

Source: National Low Income Housing Coalition tabulations of 2021 American Community Survey

- Rental shortage:
 - 14,214 affordable rental units for extremely low-income households (<30% AMI)
 - 12,723 affordable rental units for very low-income households (<50% AMI)
 - 726 affordable rental units for low-income households (<80% AMI)
- Rent burden:
 - 20% of renters are severely burdened by housing costs
 - 64% of extremely low-income renters are severely burdened by housing costs
 - A minimum-wage employee would need to work between 72 and 133 hours per week to afford a two-bedroom apartment in TN-06
- Homeownership:
 - Homeownership rate: 68%
 - 15% of homeowners live in manufactured homes, which depreciate in value
- Aging stock:
 - 63.2% of homes were built before 2000 (at least 23 years old)
 - 33% of homes were built before 1980 (at least 43 years old)

Why It Matters

Affordable housing is the backbone of healthy local economies. When a community has an adequate supply of workforce housing, employers can attract talent, and local residents can find the stability needed to make long-term plans such as pursuing a career, starting a family, and achieving homeownership. Furthermore, construction is a common economic engine in every community, creating jobs, providing training and career development, and injecting funds via wages into local economies.

One Way We're Building the American Dream in TN-06

Fahe Member Mountain Tennessee Outreach Project (Mountain T.O.P.) leverages public and private funds to complete critical home repairs in TN-06, allowing residents to remain in their family homes despite wear and tear or storm damage.

By preserving homeownership for low-income residents, Mountain T.O.P. is building the American Dream in TN-06.
